INTRODUCTION

The Montana Noxious Weed Seed Free Forage (NWSFF) program was initiated in 1989 as a voluntary program by several county extension agents, weed supervisors and producers. The NWSFF program was partially supported by a grant from the Noxious Weed Trust Fund. In 1995, the Montana Legislature passed the Montana Noxious Weed Seed Free Forage Act and delegated the administration of the program to the Montana Department of Agriculture.

NWSFF forage products have been certified by an authorized agent of the Department as being “noxious weed seed free” of Priority 1A, 1B, 2A, 2B, and 3 Montana noxious weeds and/or designated noxious weeds from other states and the Canadian provinces participating in the regional program. Certified NWSFF products include:

- Alfalfa
- Grass
- Grain
- Straw
- Forage pellets/cubes
- Erosion Wattles

NWSFF is a program that provides:

- Statewide administrative rules and policies.
- County representation in a statewide program.
- An inspection of field and storage areas.
- Certified noxious weed seed free forage.
- Noxious weed seed free mulch for revegetation projects.
- An opportunity to move forage, freely, in restricted areas.
- A list of growers that produce noxious weed seed free forage.

NWSFF is a program that provides benefits to:

- Producers by providing a market for a value-added product.
- The public by increased awareness of their role in weed management.
- Forage buyers by providing them a marketable and transportable product.
- State and Federal Agencies by reducing import of noxious weeds onto public lands.
- County Weed Districts by providing increased weed management and reduction of weed infestations.
