(If you do not understand the label, find someone to explain it to you in detail.)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Do not apply this product through any type of irrigation system.

NOTE: AN AGREEMENT MUST BE SIGNED WITH MONTANA DEPARTMENT OF AGRICULTURE PRIOR TO PURCHASE OF THIS PRODUCT.

ALFALFA (Grown for Seed Purposes):
For the control of the two-spotted mite complex.

Ground Application

Use 1½ to 2½ pints of COMITE per acre in 25 to 40 gallons of water per acre.

Aerial Application

Use 1½ to 2½ pints of COMITE in a minimum of 10 gallons of water per acre.

Restricted Entry Interval: Observe an REI of 9 days.

NOTE:

The feeding of treated foliage, alfalfa trash or seed screenings to livestock and the grazing of treated fields is prohibited.

All alfalfa seed grown or conditioned as a non-food or non-feed site in the state of Montana shall bear a tag or a container label which forbids the use of seed for human consumption or animal food. It shall be the grower's responsibility to notify the processing plants of any seed crop treated with COMITE.

No alfalfa seed grown or conditioned as a non-food or non-feed site in the state of Montana may be distributed for human consumption or animal feed.

Treated alfalfa seed is not to be used for sprouting.

COMITE is not hazardous to bees when used alone. However, bee hazards may be encountered when combined with other pesticides. Observe State Department of Agriculture regulations on the use of insecticides for seed alfalfa.

COMITE is compatible with most insecticides. Check COMITE label and information handbook for details.

**Follow all applicable directions, restrictions, and precautions on the EPA registered label.
This label must be in the possession of the user at the time of the pesticide application.**
