Alyssa went to the Honeybee convention in January. There is a shortage of Honeybees in Canada, producers might be looking for leaf cutter bees, for Canada Blueberry production. The US and Canada border has been closed for honeybees.

## **VI. New Business**

- a) 2023 Alfalfa RFP Applications
- i) USDA NASS presented by Eric Sommer. USDA-National Agriculture Statistics Service prepares district level estimate of planted acres, harvested acres, yield, production, price/pound and total value on an annual basis. A state level estimate of the gallons of Leaf Cutter Bees used per acre. Continuation of this data series is dependent upon industry partnership and more closely aligning the date series with those who benefit from it. The research timeline will start February 2023 and go through February 2024. IT was discussed to have the maps possibly redistricted, making districts larger for more input, reporting by grower. Eric told the committee that he will investigate the process and the cost. Ernest Johnson made the motion to fund Eric Sommer, USDA NASS at the full award of \$5,500.00.
