

## Fall 2025 EDRR Webinar

**Tuesday, December 16, 9:00 a.m.**

**Approved for one Montana Right of Way/Regulatory Weed credit**

Please join us for Montana Department of Agriculture's (MDA) Early Detection, Rapid Response (EDRR) Program's fall webinar. Early detection, rapid response requires partnerships, and guest presenter Jason Allen, Montana Department of Transportation's (MDT) State Weed Coordinator, works with weed managers in every part of Montana. Jason battles blueweed, scuffles with Scotch broom, victimizes ventenata, wrestles with rush skeletonweed, and much more. He will share his experiences and give recommendations about how you can best partner with him. Attendees are eligible for one Montana Right of Way/Regulatory Weed credit. No need to register, just join the webinar and have your license number ready.
